

WGL STONE CLEAN LTD

THE WGL STONECLEAN APPROACH TO MASONRY CLEANING AND BUILDING RESTORATION.

“Innovation and Originality in Restoration”.

WGL Stoneclean was acquired in 2004. At that time, the company had two employees they were turning over £100 K and was designated as traditional “sand-blasters”. Its only real innovation was the use of pure hydrofluoric acid for carbon stain removal from masonry, rather than the use of various proprietary cleaners based on hydrofluoric acid. Since 2004, the company has continued to develop its business and add value to the services that it provides. We have gradually built up a portfolio of smaller, specialist restoration-biased main contractors who pay their bills on time! With our proven record of service innovation, we have become our clients’ go-to company for problem resolution in our domain of activities. As much as we claim to deliver world-class cleaning and restoration services we also aim to deliver a good night’s sleep.
