

**28. A few years ago, we also managed to successfully duplicate an old 'random' brown glaze on a brick.**

29. When abrasively grit blasting ironworks in older buildings we are invariably instructed to wash the cleaned surfaces with dilute acid, then apply a red oxide primer in readiness for the application of intumescent paint coats.

**See point 28**

**30. Our geographic range of projects now stretches from North of Edinburgh to Plymouth and the type of building from a Bradford terrace to Durham Cathedral.**

31. THE COMPANY ADMINISTRATOR, TRACEY WHITE WILL COMMENCE HER IOSH STUDIES IN MARCH 2019.

32. All portable electrical items are PAT tested every December.

33. *In the last few years we have extended our skills and regularly we both create and close up window and door apertures as well as undertaking (< 20 sq. metres) of new brick and stonework.*

**34. All of our full-time employees now have experience in working from cradles.**

**35. We are now working with another company on a system of both cleaning and repairing tall public sector buildings.**

36. OUR INTEREST IN THE DETAIL OF OUR WORKS EXTENDS TO USING DOUBLE POLYTHENE PROTECTION OF WINDOWS WHEN WE ARE CLEANING WITH HYDROFLUORIC ACID. WE INITIALLY USE A SPECIAL CLING FILM DESIGNED TO LEAVE NO MARKS ON THE WINDOW WHEN REMOVED WHICH IS THEN COVERED BY 200-GAUGE POLYTHENE FILM SECURED WITH A LOW RESIDUE "GAFFER" TAPE.

**36. We now regularly use acrylics, sourced from Italy to strengthen certain lime-based repairs.**

**37. For over-anxious customers we are the only construction company in Western Europe that offers its clients a "Certificate of Galactic Isolation".**
